

TEMPOMATIC 4 ELECTRONIC BASIN CONTROLS

A 4-in-1 concept!

Hygiene and infection control

Water savings

Easy to maintain

TEMPOMATIC 4 electronic basin controls combine total hygiene, water savings, instant installation and simple maintenance. Add to this a sleek design and ergonomics to make it an essential item for public and commercial places!

Hygiene

TEMPOMATIC 4 is the solution that ensures total hygiene for public buildings. Any risk of spreading germs by hand is eliminated, unlike a conventional tap. It starts and stops automatically without any manual contact. The user is, therefore, fully protected.

The pipework is flushed daily - every 24 hours after the last use - to prevent bacterial development.

The TEMPOMATIC 4 is also equipped with a reduced-stagnation solenoid valve, which renews the water with each use, preventing any water stagnation inside the tap itself. The system is, therefore, also protected.

Water savings

The flow rate is pre-set at 3 lpm and can be adjusted from 1.5 to 6 litres. The TEMPOMATIC 4 provides 90% water savings compared to a conventional tap thanks to the automatic shut-off when the hands are removed from the detection field.

Simple installation and maintenance

Installation is quick and simple and does not require any additional work. A traditional mixer or tap can be replaced by a battery-operated TEMPOMATIC 4 in a few minutes and without any electrical connection required. All components are accessible from the front without shutting off the water. Maintenance can be done without removing the mixer or tap, saving a significant amount of time for public buildings.

Ergonomics

Without any manual contact, the TEMPOMATIC 4 activates as soon as the user's hands are detected and stops when they are removed. On the mixers, the temperature can be adjusted using the side lever.

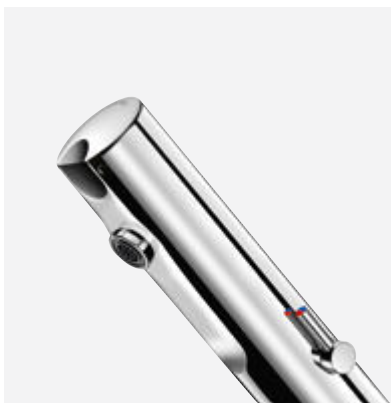

Design

The clean, timeless lines of the TEMPOMATIC 4 allow it to integrate perfectly into any type of public place and installation. DELABIE mixers and taps will withstand intensive use and vandalism in public buildings. Their robust design and sleek shapes prevent any attempt to remove them.

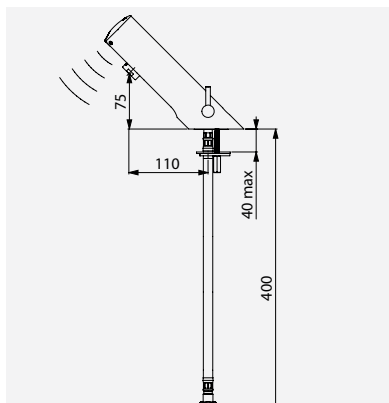

PRODUCT BRIEF / TEMPOMATIC 4 ELECTRONIC CONTROLS

DELABIE's TEMPOMATIC 4 electronic basin mixers and taps provide 90% water savings and can be installed in minutes. User and system hygiene are guaranteed thanks to non-touch operation, a periodic duty flush and the reduced-stagnation solenoid valve. Combining comfort and hygiene, the sleek design of the TEMPOMATIC 4 is suitable for all types of public places and any user, regardless of their degree of autonomy. 10-year warranty.
